

Task/Challenge: Interactive Map Integration

Description:

Enhance the user experience on the TourEthiop website by integrating an interactive map feature. The map should provide users with an engaging and informative way to explore various tourist destinations in Ethiopia.

Requirements:

- 1. Destination Information:** Implement markers or pop-ups on the map to display brief information about each tourist destination. This information may include the name of the location, a short description, and relevant images.
- 2. User Interaction:** Enable users to click on a marker or destination to access detailed information, including travel tips, nearby accommodations, and links to relevant articles or blog posts.
- 3. Responsive Design:** Ensure that the interactive map is responsive and user-friendly across various devices, including desktops, tablets, and mobile phones.

Benefits:

- ☐ Enhances user engagement and provides a visually appealing way for users to discover Ethiopia's diverse tourist destinations.
- ☐ Differentiates the TourEthiop website by offering a unique and interactive feature.
- ☐ Attracts users interested in planning their trips and exploring the beauty of Ethiopia.

This task not only adds value to the user experience but also showcases your ability to integrate dynamic and interactive features into a tourism website. Make sure to discuss any additional specifications or preferences with your client before starting the project.
